ABOUT RKS

RKS is an IT Services and consulting company ,which offers technology solutions to the clients of various business verticals. We provides cost effective IT solutions, based on the requirements of the organization and offers end to end solutions.

Strategy: Developing integrated business solutions with cosmic consulting experience and innovative thinking. Effective utilization of young technical expertise to create customized solutions and deliver the product with added flavor.

Our service range covers data centre solution, command control centres, surveillance management solutions, video conference solutions, network management services, cloud computing services, annual maintenance contract, Custom Application Development, Mobile Application Development, Ecommerce Solutions, Product Development and Testing services. We are a results driven company that has grown to serve a broader clientele. The growth of creative us is a direct result of helping our clients get the results they need over and over again, through long-term partnerships, and a foundation built on reliability and excellency.

To every project, we bring a combination of industry knowledge, unique company culture and some of the best technical talent. Our clients' business outcome is the true measure of our success and pushes us to find creative solutions to the most difficult problems. Rooted in deep domain knowledge and technology expertise, our offering includes new product design, enterprise system modernization, and managed services. Over the years, RKS has built a scalable and resilient operation: proprietary R&D, strong financial position, solid infrastructure, and outstanding development teams.

We are constantly enthused by every new project we take because we know every service is getting you closer to the results you need. Partnering with us will give you a peace of mind and a much needed competitive advantage. We would love to talk with you about all digital things and how best we can help.

RKS is a z-generation company that works on the world's most bleeding-edge technologies. **We love what we do and have a good time doing what we love.**

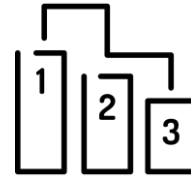

OUR MISSION

RKS is an end-to-end IT services and solution based company. We at RKS guide our clients on their digital transformation journeys, multiply their capabilities, and help them harness the power of innovation to steer into new digital era.

TECHNOLOGY INDEPENDENCE

Through our partner network with the world's leading technology providers, we deliver the best, most proven solutions to de-risk technology investments

WORLD CLASS TALENT

We are investing to attract and upskill the talent who will lead global business tomorrow

CLEAR AND CONFIDENT VISION

We have met the challenges of innovation many times before, and have a clear and confident vision for helping clients navigate the future

RKS provides end to end solutions to support end users and adopt new technologies. We provide data centre solution, command control centres, surveillance management solutions, video conference solutions, network management services, cloud computing services, dev ops, database management services, annual maintenance contract, wireless devices, mass storage devices, business applications software, computer supplies and accessories. We are mainly partner with multiple OEM's like Dell, HP, Lenovo, Acer, cisco, Logitech etc.

Performance,
Scalable & efficient
solutions

RKS has an extensive portfolio of enclosures and aisle containment systems for your data center and/or server room. RKS is ideal for the installation of servers, switches, patch panels, routers and storage equipment. Modularity and flexibility are always key in the design of our products. Our services focus on maximizing your worldwide activities easily and lowering IT investments while delivering increased efficiency and agility

Our executive solutions combine the highest quality voice, video, and content sharing to ensure everyone is able to fully participate in the conversation. Now your teams can collaborate, make decisions and drive impact.

RKS has tapped into new workplace trends and transformed the video conferencing industry with enterprise-quality tools priced for businesses of all sizes. We provide HD-quality video communications to the huddle rooms and complete collaboration solutions with a line-up of Conference Cams, webcams, and presentation devices. We are mainly partner with multiple OEM's like Logitech, VM Ware, Accops etc.

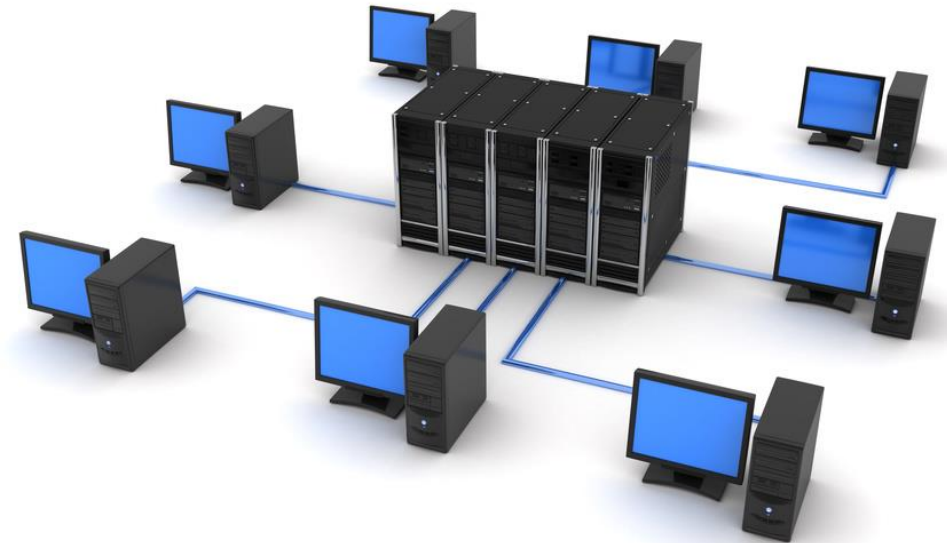

RKS provides a comprehensive portfolio of the best end-to-end imaging, smart analog and IP video surveillance tools ranging from video surveillance cameras, high-definition IP video surveillance cameras, mobile DVRs, tailored enterprise level safety systems, bullet cameras and much more.

Monitoring a security system in real time enables you or your safety team to see a prospective criminal entering your company or infringing on your property as soon as possible. This velocity enables you to step in and avoid a crime.

RKS offers a wide range of network managed services, depending on the structure of the branches and the needs of specific companies:

- **LAN** - Conceived networks covering single office buildings or campuses for offices or universities. This solution ensures the greatest bandwidth available for customers within brief link distances.
- **WAN** - designed networks with a coverage over customer's geographically dispersed locations / branches.
- **Wi-Fi** network – RKS offers a comprehensive service of initiating Wi-Fi wireless data networks in locations indicated by the customer. The resulting infrastructure provides access to the Internet of network devices such as PCs, notebooks, PDAs, smartphones etc. The solution can be supported by a platform that provides access authorization for users.
- **Satellite data transmission** – networks designed by us cover also locations with no other terrestrial communications. The advantages of satellite communications are mobility and network availability in virtually any location.

RKS cloud services include moving your infrastructure, data, applications, and workloads to the preferred cloud platform, often requiring a bridge back to your current on-site / infrastructure. Each type of migration is based on specific methodologies that have been proven. Our Application Hosting Management Services provides a safe, flexible and cost-effective method for monitoring and managing your on-demand apps and information. We offer the fastest hardware and network in the industry with scalable environments.

- IaaS (Infrastructure as a service)
- PaaS (Platform as a service)
- SaaS (Software as a service)

RKS provides viable consulting services for companies, looking to increase productivity while reducing IT infrastructure costs. Switching to virtualization helps in controlling workloads across data centres in addition to reducing energy consumption and IT infrastructure. Virtualization space include server virtualization, desktop migration and thin provisioning.

- a) Application virtualization
- b) Desktop virtualization
- c) Hardware virtualization
- d) Storage virtualization
